

SENIOR B AUTOMATIC STRETCH WRAPPER

DESCRIPTION

The Senior B is a remote-controlled stretch wrapper fitted with a powered roller turntable to automatically out-feed the pallet. At the out-feed end is an unpowered roller conveyor for holding the pallet prior to removal. The Senior B automatically hooks, cuts and welds the film to a fully loaded pallet and then out-feeds the pallet to the unpowered roller conveyor ready to receive another pallet.

FEATURES

- Powered Roller Conveyor on the Turntable
- Suitable for all Types of Stretching Film
- Equipped with Remote Control for Starting and Stopping
- Powered Film Pre-Stretching
- Variable Speed on Carriage and Turntable
- Progressive Start and Exact Stop on Turntable to Ensure Pallet Alignment
- Unpowered Roller Conveyor at Machine Out-feed to Hold One Completed Pallet
- Siemens S7-200 PLC Control
- Harmonics Suppressor Line Filter
- Automatic Pallet Height Detection by Photocell
- Double Wrapping Cycle (Simple and Double)
- Rainproof Wrapping Cycle
- Independently Programmable Reinforcement Reel Laps on Top and Bottom
- Hot Welding Film Cutting System
- Maximum Pallet Height: 2,400mm
- Maximum Pallet Size: 1,200mm x 1,000mm
- Maximum Pallet Weight: 1,500kg
- Power Required: 380VAC or 220VAC
- Maximum Power Consumption: 2.5kW
- Total Weight: 730kg
- Pneumatic Air Pressure: 6 bar
- Air Consumption: 11 litres/minute

OPTIONS

- Blade Film Cutting
- Powered Top Platen to Stabilize Load
- Hot-Welding on Load Film Cutting System
- Automatic Top Film Sheet Dispenser
- Film Narrower
- 2m Safety Interlock
- Forklift Crash Protection
